PROPERTY ACCESS

(To be completed by property owner)

The United States Environmental Protection Agency (EPA) is conducting further investigations of the lead contamination at the Washington County Lead District Superfund Sites in order to evaluate the risks posed by historical mining activity in the area. As part of this evaluation, the EPA needs to look at the lead levels found in surface soils, home interior dust, and drinking water at a number of residential properties. Your assistance in this investigation will provide critical information in determining the risks posed by potential lead contamination. Black and Veatch Special Projects Corp. (BVSPC) is under contract with the EPA to assist in the determination of levels of lead and other metals in surface soils, home interior dust, and drinking water within the Washington County Lead District Sites. Your cooperation is requested in giving BVSPC/EPA permission to access your property for the purpose of collecting soil, dust, and water samples in support of this investigation. Contact Bruce Morrison at the EPA, (913) 551-7755, for further information.
